The State of Collaboration in Australia:

IT leadership perspectives

Independent market research company Vanson Bourne surveyed 2,500 IT and business decision makers on the state of collaboration in their organisations. These are the results from 100 IT decision maker and 400 business decision maker respondents in Australia.

Australian businesses are facing a productivity problem

39%

of business decision makers' time at work is spent on tasks that don't add critical value to the organisation, impacting innovation and growth

IT teams are addressing issues by prioritising...

24%
...implementing emerging technologies

17%
...simplifying their technology ecosystem

22%
...working more collaboratively with other teams

IT leads recognise that business growth is dependent on effective collaboration, and affording teams the tools and technology to be successful

74%

of ITDMs believe significant or large improvements are required to collaborative working in their organisation, with such improvements expected to:

94%
Bring about organisational success

91%
Help employees work smarter, easier and quicker

92%
Drive successful innovation

The value of a connected workspace, which unites content, tools and teams, is clearly understood by ITDMs

93%
report that a connected workspace will improve the way that teams work and bring about business results, such as...

51%
...time savings and work efficiencies

46%
...increased employee productivity

42%
...increased creativity and ideas

40%
...increased innovation

35%
...increased sales and revenues
