

The State of Collaboration in Germany:

IT leadership perspectives

Independent market research company Vanson Bourne surveyed 2,500 IT and business decision makers on the state of collaboration in their organisations. These are the results from 100 IT decision maker and 400 business decision maker respondents in Germany.

German businesses are facing a productivity problem

27%

of business decision makers' time at work is spent on tasks that don't add critical value to the organisation, impacting innovation and growth

IT teams are addressing issues by prioritising...

25%

...implementing emerging technologies

21%

...simplifying their technology ecosystem

30%

...working more collaboratively with other teams

IT leads recognise that business growth is dependent on effective collaboration, and affording teams the tools and technology to be successful

65%

of ITDMs believe significant or large improvements are required to collaborative working in their organisation, with such improvements expected to:

89%

Bring about organisational success

91%

Help employees work smarter, easier and quicker

84%

Drive successful innovation

The value of a connected workspace, which unites content, tools and teams, is clearly understood by ITDMs

92% report that a connected workspace will improve the way that teams work and bring about business results, such as...

41%

...time savings and work efficiencies

47%

...increased employee productivity

40%

...increased creativity and ideas

39%

...increased innovation

30%

...increased sales and revenues

Dropbox commissioned independent market research specialist Vanson Bourne to undertake the research upon which this infographic is based. A total of 2,500 business and IT decision makers were interviewed during July and August 2019. All respondents are from organisations with 250 or more employees, and they must collaborate with at least one person on a daily basis, and also use software and applications to get their work done. The results here are based on the total samples of IT decision maker and business decision maker respondents in Germany.
