

The State of Collaboration in the UK:

Construction

Independent market research company Vanson Bourne surveyed 2,500 IT and business decision makers on the state of collaboration in their organisations. These are the results from 100 respondents in the construction industry in the UK.

A lack of productivity in construction is impacting business results

This, paired with other team-specific challenges, is resulting in:

14%

Compromised speed to delivery

20%

A slower bid process

18%

Wasted time

Business success is dependent on reinventing the way that your teams collaborate

55%

say significant or large improvements are needed to collaborative working in their organisation, and that creating a collaborative culture will help:

93%

Avoid unnecessary costs and delays

88%

Deliver more projects on time

86%

Ensure future business success

A connected workspace, which connects your content, tools and teams, is the first step towards improving collaboration and enabling teams

86% believe a connected workspace will improve business results by...

56%

...saving time and efficiency

53%

...increasing employee productivity

38%

...increasing innovation

36%

...increasing creativity

Dropbox commissioned independent market research specialist Vanson Bourne to undertake the research upon which this infographic is based. A total of 2,500 business and IT decision makers were interviewed during July and August 2019. All respondents are from organisations with 250 or more employees, and they must collaborate with at least one person on a daily basis, and also use software and applications to get their work done. The results shown here are based on the total sample of respondents from the construction industry in the UK.
