

Dropbox Business services partner: MaaXcloud

MaaXcloud offers a complete white glove service for small and medium-sized companies, using proven methods, tools, and certified professionals. MaaXcloud offers fixed prices and scope, so you only pay for what you need.

Package	Price	Description
Setup		
Dropbox Business End User Setup	\$25/user	Setup includes configuration on one computer and mobile device. Admins will be given a walkthrough of the administrative console and an overview of security features.
SMB Dropbox Business Tenant Setup (<150 employees)	\$200	Setup includes admin setup, end user tenant setup, provisioning of end users, and installation of mobile client. Admins will be trained on options for sharing, group creation, data migration and client installation plan.
Mid-market Dropbox Business Tenant Setup (151 – 1,000 employees)	\$300	Setup includes end user account provisioning, business domain verification, and installation guides for desktop and mobile devices. Admins will be trained to support end users, third party applications, and power users.
Training		
Dropbox Business End User Training (up to 25 users per session)	\$200	Training will cover web, desktop, and mobile functionality, file sharing, folder and group management, and concludes with a Q&A period to ensure users have the information they need to be successful.
Migration		
Dropbox Business White Glove Migration (up to 20GB per user) *	\$20/user	Migration service includes a three phase process designed to migrate up to 20GB per user of data from an existing storage environment.
1GB of Additional Dropbox Business Migration Capacity (add-on)	\$1/GB	Migration service add-on is designed for migrations that are larger than what is included in the Dropbox Business White Glove Migration.

MaaXcloud may update their offerings and pricing at any time without notice. Please check with MaaXcloud for up-to-date information.

* MaaXcloud can help you migrate data from the following sources: Dropbox, Box and Box Enterprise, Microsoft SharePoint (document and folders only), Microsoft OneDrive and Microsoft OneDrive for Business, and Google Drive.
